

The rugged city scooter.

The new BW's 125 is a commuter scooter designed for city life. Its 125cc, 4-stroke, fuel-injected, air-cooled engine gives you the kind of quick acceleration that's ideal for stop-start urban journeys, while the chassis provides agile handling to glide through smaller spaces.

Its big, all-terrain style tyres offer great grip whatever the weather, and while the frame is light and easy to handle, it's also durable and rigid. Riding with a passenger becomes an effortless pleasure thanks to under-seat storage for a full-face helmet, and a two-up passenger seat.

- Unique design includes exposed frame
- Rugged 125cc city commuter
- Fuel-injected 4-stroke engine
- Easy, agile handling
- All-terrain style tyres for constant control
- Good storage capacity and two-up seat

The practical, flexible choice

Our 125cc scooters combine city practicality with the power for longer trips. All models have 4-stroke single cylinder engines that combine performance, refinement and resilience, while disc brakes provide an additional level of security for assured stopping.

And there are a host of features to make longer rides more comfortable; large seats provide ample room for a pillion passenger, and the glove box and under seat storage are great for stowing those weekend-away essentials.

Combined with stylish instrument panels and piercing head and tail lights, and you have a machine that's as at home in the town as it is in the suburbs.

Unique design

In keeping with its status as a scooter-about-town, the BW's 125 comes with some unique styling. Its very shape marks it out as something different from the herd, as do its fun, sporty graphics and exposed frame.

Fuel-injected engine

The BW's 125cc fuel-injected engine is a versatile piece of equipment, providing the power to ride 2-up but this is also an engine with a kick, and the kind of off-the-line acceleration that's so important on stop-start city journeys and commuting.

Dynamic lights

One of the BW's 125's most distinctive and noticeable features is its lighting system. In keeping with the unique and urban design flourishes seen across the scooter, the dual headlight is a bold shape, giving the front a particularly dynamic appearance.

Rugged frame

The BW's 125 is a rugged city commuter. Light enough to handle easily, it has a tough, heavy-duty exposed frame, and a sleek, strong and masculine design. An extra wide handlebar always gives you maximum control and flexibility.

Grip and response

In the city, the terrain can change suddenly. Whether its potholes, cobble streets, or a heavy downpour, you need to know you can maintain control. The BW's 125 has 12inch all-terrain style tyres and off-road style dual rear shock absorbers to ensure a steady, comfy ride wherever you go.

Practical features

To make your ride as enjoyable as possible, the BW's 125 comes with enough under-seat storage to carry a full-face helmet, and a two-up seat – to ensure that your passenger enjoys the ride as much as you. Other high-end details include an artfully designed instrument panel.
